

## CHAPTER V

### CONCLUSION AND SUGGESTION

This chapter consists of two parts conclusion and suggestion. This chapter explains briefly about conclusion and suggestions.

#### 5.1 Conclusion

Based on the result of test, singing method give the effect toward students' speaking skills. It is proved from, there is a significant difference between the results on pretest and posttest. There are changes after the researcher implemented that method.

Based on the result of two related test  $<0.001 < 0.05$  that null hypothesis is rejected and alternative hypothesis is accepted, the use of singing method has given the great influence and significantly affect students' speaking skills at SDN 2 Padamulya, in academic year 2023-2024. It is proved by the pre-test and post-test scores resulting 62.28 improved to 87.78. It means that the two related tests on pretest and post-test shows the significant improvement before and after using singing method, and this method improve on students' speaking skills.

Apart from that, students' attitudes towards using the singing method gave a positive response. This can be proven from the results of the questionnaire which shows that each aspect has a percentage above 50%. such as aspects of affective have 89%, 86% and 69%. then behavioral aspects have 89%, 67% and 75%. finally, the cognitive aspect has 97%, 86%, 97% and 81% for each statement item.

## 5.2 Suggestion

Based on the results of this research, researchers revealed that students have find solutions in speaking skills. Therefore, researchers propose several suggestions as follows:

First, for English teachers, they must know students' difficulties in speaking skills especially in speaking English. They must apply appropriate media, methods, and strategies to teaching speaking skills that make students feel comfortable so they can understand the material.

Second, English for students, they must be more aware of its importance speaking skills. They must maintain their inner motivation to learn English and speak it in everyday life.

Third, it is hoped that further research can be carried out by further researcher choosing a singing method to improve students' speaking skills better application. They may collaborate it with the right media and strategy overcome students' problems in speaking skills.
