CHAPTER V

CONCLUSION AND SUGGESTIONS

5.1 Conclusion

The research on slang words in the post and comment section of the "*Grup Jual Beli eFootball PES 2023*" Facebook community has provided valuable insights into the types and usage of slang within this online community. This chapter summarizes the key findings and provides recommendations for future research and practical applications.

a. Types of Slang Words :

The analysis identified five types of slang words: Fresh and Creative, Imitative, Flippant, Acronym, and Clipping. The distribution of these types was as follows: Fresh and Creative: 34 occurrences, Imitative: 42 occurrences, Flippant: 0 occurrences, Acronym: 88 occurrences, anfd Clipping: 104 occurrences.

b. Community Identity:

The prevalence of Clipping and Acronym slang types suggests that the community values efficient and rapid communication. This is typical of transactional environments where quick and clear exchanges are critical. The use of Fresh and Creative slang, though less frequent, indicates a creative and engaging subculture within the community. The absence of Flippant slang implies

a serious and focused approach to interactions, reinforcing the community's transactional nature.

c. Meanings of Slang Words:

The meanings of the slang words used reflect the community's shared understanding and specialized knowledge. Terms like "murmer" (*murah meriah*) and "silog" (*sisa login*) are examples of slang specific to the community, fostering a sense of belonging and insider status among members.

5.2 Suggestion for Future Researchers

a. **Expand Data Collection:**

Future studies should consider analyzing a larger dataset over a more extended period to gain deeper insights into the evolution of slang usage.

b. **Mixed Methods Approach:**

Combining quantitative analysis with qualitative methods such as interviews or focus groups can provide a more comprehensive understanding of the reasons behind the use of specific slang terms and their impact on community dynamics.

c. **Comparative Studies:**

Conduct comparative studies across different online communities to identify unique and common trends in slang usage. This can help understand the influence of different contexts on the development of slang.
